GEORGIA TECH'S SPACEX HYPERLOOP COMPETITION TEAM

SPONSORSHIP PACKAGE
2019-2020 COMPETITION YEAR

GT HyperJackets

hyperjackets.gatech.edu

Dear potential sponsor,

The **Georgia Tech HyperJackets** are a diverse group of **60+ undergraduate/graduate students** who are working to propel the development of the "5th mode of transportation", **the Hyperloop**.

Our team consists of students from a wide variety of majors including aerospace, mechanical, computer, and electrical engineering as well as material and computer science. We share interest and experience in **CAD, machining, rapid prototyping, PCB design, CFD, etc.**

In each of the last two years, our team was **one of less than 50 teams (out of more than 700)** to make it to the Final Design Review stage of the competition. This year we are currently working on designing and manufacturing an improved pod and preparing for next year's competition.

Best,

GT HyperJackets

What is SpaceX's Hyperloop Competition?

The Hyperloop concept was proposed by Elon Musk in 2013 as a high-speed transportation system. Traveling directly between major cities at speeds above 700 mph, the Hyperloop system seeks to revolutionize the model of long-distance transportation. To accelerate research behind the pod concept, SpaceX hosts an annual pod competition that challenges universities from around the globe to **design and build a functioning pod prototype**.

Why Sponsor?

Georgia Tech has a tradition of developing excellent relationships with companies that want to support STEM education and gain more visibility in various industries. We are actively seeking out new sponsors and looking for ways to create value on both sides of the relationship. Associate your brand with our team and place your company's name on promotional items across Georgia Tech and at the SpaceX Hyperloop Pod Competition. We also welcome you to meet with prospective interns and the next generation of highly skilled engineers and leaders. Our sponsors and partners play a key role in our success, and we hope to develop that relationship with YOU!

How can you sponsor?

Contributions to our team help purchase materials, parts, manufacture components, fabricate our pod, transport the pod to and from the competition in California and transport and support the student team. Your support may also be a tax deductible donation to the Georgia Tech Foundation. We also welcome support in advertising or endorsing our team.
